

Conflict Style Inventory

Assessing Your Conflict Style

Hocker, J.L. and Wilmot, W.W. (2001). *Interpersonal Conflict (10 ed.)*, New York, N.Y.: McGraw-Hill Education.

Purpose

1. To identify your conflict style
2. To examine how your conflict style varies in different contexts or relationships

Directions

2. According to the scale below, fill in your scores for Situation A and Situation B. For each question, you will have two scores. For example, on Question 1 the scoring might look like this: 1. 2 | 4
3. Write the name of each person for the two situations here:

Person A _____ Person B _____

1 = never

2 = seldom

3 = sometimes

4 = often

5 = always

Scoring Interpretation

This questionnaire is designed to *identify* your conflict style and *examine* how it varies in different contexts or relationships. By comparing your total scores for the different styles you can discover which conflict style you rely most heavily upon and which style you use least. Furthermore, by comparing your scores for Person A and Person B, you can determine how your style varies or stays the same in different relationships. Your scores on this questionnaire are indicative of how you responded to a particular conflict at a specific time and therefore might change if you selected a different conflict or a different conflict period. The Conflict Style Questionnaire is not a personality test that labels or categorizes you; rather, it attempts to give you a sense of your more dominant and less dominant conflict styles.

Scores from 21 to 25 are representative of a very strong style.

Scores from 15 to 20 are representative of a strong style.

Scores from 11 to 15 are representative of an average style.

Scores from 6 to 10 are representative of a weak style.

Scores from 0 to 5 are representative of a very weak style.
